

UMANG PRATAP SINGH

Backend Developer (2 years)

@umangpratapsingh4141@gmail.com

+918630240576

India

SUMMARY

- Experienced Backend Developer with 2 years of expertise in Java, Spring Boot, Hibernate, and MySQL, building scalable applications and RESTful APIs. Skilled in system integration, performance optimization, and real-time communication using WebSockets. Familiar with React.js and JavaScript for full-stack contributions. Adept at problem-solving and collaborating in cross-functional teams.

EXPERIENCE & PROJECTS

Senior Associate Software Engineer

Magic Edtech

July 2024 – Ongoing

Noida, India

- Developed a Spring Boot microservice for seamless external API integration and efficient data transactions.
- Implemented event-driven architecture using RabbitMQ to synchronize multiple databases, ensuring data consistency during complex transactions.
- Integrated third-party REST APIs to enhance functionality and streamline workflows.
- Secured endpoints with JWT and Okta for robust authentication and authorization, ensuring compliance with enterprise security standards.
- Deployed containerized environments using Docker to isolate user-initiated projects, providing secure, scalable, and conflict-free execution environments for diverse use cases.
- Optimized file and media management by integrating AWS S3 for scalable storage solutions.

Associate Software Engineer

Magic Edtech

July 2023 – July 2024

Noida, India

- Developed a web-based testing automation tool supporting both API and UI testing.
- Integrated LLM models (OpenAI, Gemini) to extract locators, generate test cases, and more from content for API and UI automation.
- Migrated the workspace from the file system to Amazon S3, improving scalability and storage management.
- Implemented role-based authentication using JWT, ensuring secure user access.
- Designed a report generation system for detailed test execution insights.

Intern

Magic Edtech

Feb 2023 – June 2023

Noida, India

- Assisted in the development of backend APIs for educational tools.
- Gained experience in REST API design, database management, and performance optimization.
- Optimized API integration processes, improving response times and enhancing overall system performance.

SKILLS

- Backend Development:** Java, Spring Boot, Spring MVC, Hibernate, Spring ORM, Flask
- Database Management:** MySQL, Oracle, PostgreSQL
- Real-Time Communication:** WebSockets, Kafka
- Performance Optimization:** Multithreading, API Optimization, Caching
- Tools & Workflow:** Git, Jira, Agile Methodologies
- Scalable Architecture:** Modular Design, Microservices, Event-Driven Architecture

CERTIFICATIONS

- Java Certification from Hackerrank.
- Problem Solving Certification from Hackerrank.
- Certificate of Merit (Flipkart GRID 2.0) at Institute Level.

EXTRA-CURRICULAR

- Logical and Aptitude Problem Solving
- Cricket and Badminton
